GEO WHAT? Geothermal!

In Klamath Falls, we are fortunate to have renewable energy resources!
Can you see the big building behind you? That is a geothermal power plant!
Geothermal is energy made by hot water under the ground that is pumped up and used to generate electricity to heat Oregon Tech and Crystal Terrace. Sky Lakes Medical Center heats with geothermal too.

Look ahead! Can you see the solar panels? This solar array captures the energy from the sun to make electricity.

DID YOU KNOW?

- The Oregon Tech campus is the only campus that is geothermally heated in America!
- Each year, the solar panels that you see create the same amount of energy as 225,000 gallons of gasoline.
- Sky Lakes Medical Center heats most of its campus with geothermal energy too!
- The combined use of geothermal energy at Sky Lakes and Oregon Tech is the equivalent of removing 756 cars from the road every year!

GEO TRAIL RULES:

1. The Geo Trail is designed for pedestrians only. Please walk your bike!
2. Keep dogs on a leash and pick up after your pets.
3. Please stay on marked trails.
4. No motor vehicles, hunting, or shooting allowed.
5. Smoking and alcoholic beverages are prohibited.
6. No camping, fire, or fireworks.
7. Please pack out your trash or use the provided trash receptacles.
8. Geo Trail hours are sunrise to sunset. Enjoy your experience on the Geo Trail!

Like trails? Want to help maintain, improve or expand the trail system?
Join the Klamath Trails Alliance and help share the wealth of local labor and materials using sustainable construction techniques. Linking Quail Park at Crystal Terrace, Sky Lakes Medical Center and Oregon Institute of Technology, it provides scenic vistas of the Klamath Basin below, and offers an opportunity for relaxation and physical activity to all who enjoy it.

The Geo Trail was created by:

With special thanks to Diversified Contractors, Inc. and the many local businesses and volunteers for their generous support.

Welcome!
